Hello Shaun,

Welcome to "C/C++ Programming I". The following 11 files should be attached to this e-mail:

1. C1_Syllabus.pdf
2. HowToPrepareAndSubmitAssignments.pdf
3. CourseBookUpdates.pdf
4. U08713628-C1A1_Requirements.zip
5. U08713628-C1A2_Requirements.zip
6. U08713628-C1A3_Requirements.zip
7. U08713628-C1A4_Requirements.zip
8. U08713628-C1A5_Requirements.zip
9. U08713628-C1A6_Requirements.zip
10. U08713628-C1A7_Requirements.zip
11. U08713628-C1A8_Requirements.zip

Please carefully read this entire e-mail and note that additional answers to most course-related questions can be found in the documentation available on the course Blackboard website at <https://ucsdextension.blackboard.com>. Always feel free to contact me via e-mail as often as you wish if you have additional questions or issues.

GENERAL INFORMATION

The 11 attachment files listed above contain the course syllabus, assignment preparation and submission information, and your personalized set of assignment requirements for the entire course. Documents (not attached to this e-mail) describing the configuration and usage of three popular program development applications are available on the "Assignments" page of the course website and referring to them can save you a lot of wasted time and frustration.

PERSONALIZED ASSIGNMENTS

To help insure course integrity assignments may differ for each student, although the topics covered and difficulty levels are equitable. For this reason using someone else's requirements may result in incorrect solutions and significant credit loss.

LAST DAY TO DROP THIS COURSE WITH A REFUND: MONDAY, APRIL 6, 2020

UCSD Extension allows no exceptions to this policy so IT IS EXTREMELY IMPORTANT that you start the first assignment as early as possible to help determine your readiness. Students sometimes find that

they do not have the necessary prerequisite knowledge and prefer to do some catch up studying on their own or take a refresher course first.

COURSE DISCUSSION BOARD

I encourage students to communicate with each other using the course website's "Discussion Board". You may use it for anything you deem relevant to this course, programming in general, or career issues you may have. Also feel free to discuss general strategies and questions regarding homework assignments, but I request that you don't provide actual answers/solutions because that would not be fair to other students in the class. If you subscribe to one or more Discussion Board forums you will be automatically notified of new postings. Please do not use the Discussion Board to contact me, but instead contact me directly via e-mail.

MISSING E-MAILS?

If you do not receive an expected course e-mail from me or the assignment checker in a timely manner please check your spam mailbox even if you have previously been receiving such e-mails without problems. Some spam filters will seemingly randomly begin classifying previously acceptable e-mails as spam.

MISSING E-MAIL ATTACHMENTS?

If you did not get all 11 attachment files listed at the beginning of this email or if you don't get expected attachments in future e-mails please contact me. While it is possible that the problem is on my end, students usually find that attachments are getting stripped off or corrupted on their end due to their organization's IT security policies or other issues. Such e-mail systems are not suitable for this course because the ability to receive TXT, PDF, and ZIP attachments is vital. To resolve this issue I recommend using a free e-mail account from a generic provider of your choice. If you do change e-mail addresses please let me know so I can update my records and resend those attachments.

Thanks and good luck!

Ray Mitchell
